

# ActivIdentity USB Tokens

Full-featured convenience for two-factor authentication, digital signing, and encryption

ActivIdentity™ USB Tokens provide strong security in an easy-to-use, portable form factor that has the same two-factor authentication, digital signature, and encryption capabilities as a smart card.

ActivIdentity USB Tokens connect directly to the user's workstation or laptop, eliminating the need for special readers and saving IT organizations time and money. Users simply plug the token into an available USB port to enable strong authentication for workstation, network, remote, or application access, or to encrypt or digitally sign information and transactions.

ActivIdentity USB Tokens complement employee identification, identity management, and public key infrastructure (PKI) initiatives with credential storage and strong security services for proving identity. ActivIdentity USB Tokens work together with ActivIdentity ActivID™ Card Management System, ActivIdentity ActivClient™, and ActivIdentity 4TRESS™ AAA Server for Remote Access to provide authentication services to networks, data, and applications.

The ActivIdentity USB Tokens family consists of two products: ActivIdentity ActivKey® SIM USB Token and ActivIdentity ActivKey® Display USB Token.

ActivKey SIM USB Token

ActivKey Display USB Token

### ActivIdentity ActivKey SIM USB Token

The ActivIdentity ActivKey SIM USB Token combines the security of a smart card with a built-in USB reader. The field-serviceable subscriber identity module (SIM) provides organizations with a path for future upgrades without requiring them to purchase additional readers.

### ActivIdentity ActivKey Display USB Token

The ActivIdentity ActivKey Display USB Token supports online authentication using a SIM and built-in USB reader, as well as offline strong authentication using one-time passwords.

## ActivIdentity USB Token Features and Benefits

ActivIdentity USB Tokens support the following features:

- Secure storage of static passwords, one-time passwords, and PKI credentials
- User self service so that users can change their own PINs, store and manage their static passwords / user names, and download and delete digital certificates (through ActivIdentity ActivClient or the self-service web portal of ActivIdentity ActivID Card Management System)
- Device removal to lock the workstation

ActivIdentity USB Tokens offer the following benefits:

- Improve cost efficiencies by eliminating multiple form factors for identification and by minimizing token administration for logical, remote, and facilities access
- Save time and money by enabling readerless deployment (by connecting directly through the USB interface)
- Complement employee identification, identity management, and PKI initiatives with credential storage and strong security services for proving identity

## Technical Specifications

	ActivIdentity ActivKey SIM USB Token	ActivIdentity ActivKey Display USB Token
<b>Key Features</b>	- User-serviceable SIM replacement for future upgrades and troubleshooting	- Online and offline authentication with one-time passwords and PKI; user-serviceable SIM replacement
<b>Target Users</b>	- Employees - Partners - Contractors	- Employees - Contractors
<b>Usage</b>	- Plug into computer USB port	- Plug into computer USB port; read one-time password from display
<b>Main Features</b>	- PKI (1024-2048) - Online OTP (via ActivIdentity OTP applet); OATH support planned - Smart Chip Platform · ISO 7816 1-2-3 SIM cards · EMV level 1 tested - FIPS 140-2 Compliance · 140-2 L3 for the SIM card · 140-2 L2 with the applets  - Multi-color LED	- PKI (1024-2048) - Offline OTP (via display); Time + Event; OATH support planned - Smart Chip Platform · ISO 7816 1-2-3 SIM cards · EMV level 1 tested - FIPS 140-2 Compliance · 140-2 L3 for the SIM card · 140-2 L2 with the applets  - Multi-color LED
<b>Battery Life Expectancy</b>		- 8 years
<b>Weight (grams)</b>	- 12	- 25
<b>Dimensions (mm)</b>	- L71.3 x W20 x H8.8	- L80 x W21 x H10
<b>Hardware Warranty</b>	- 1 year	- 1 year
<b>Interfaces</b>	- Software driver Microsoft certified · CCID compatible, · Windows® XP, 2000, 2003 Server, Vista, Windows 7 · Linux® · Mac OS® - USB · USB 2.0 12 Mbps	- Software driver Microsoft certified · CCID compatible · Windows® XP, 2000, 2003 Server, Vista, Windows 7 · Linux® · Mac OS® - USB · USB 2.0 12 Mbps
<b>Customization Options</b>	- Logo, case color, smart chip	- Logo, case color, smart chip, token profile
<b>ActivIdentity Compatible Products</b>	- ActivIdentity ActivID Card Management System, ActivIdentity ActivClient, ActivIdentity SecureLogin™ Single Sign-On, and ActivIdentity 4TRESS AAA Server for Remote Access
